

Build guideline for browser extension

1. How to build

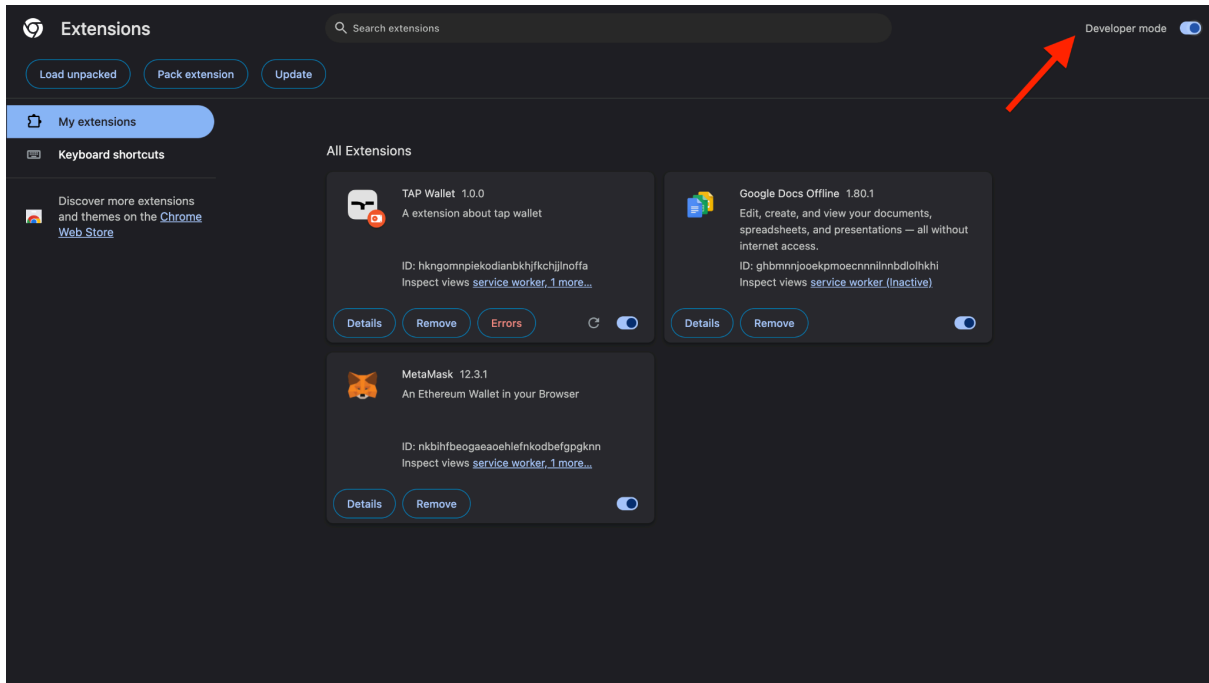

- Install [Node.js](https://nodejs.org) version 16 and above
- Install [Yarn](https://yarnpkg.com/en/docs/install)
- Install dependencies: `yarn`
- Build the project to have `./dist/` folder with `yarn build`

2. Step to load unpack to browser chrome

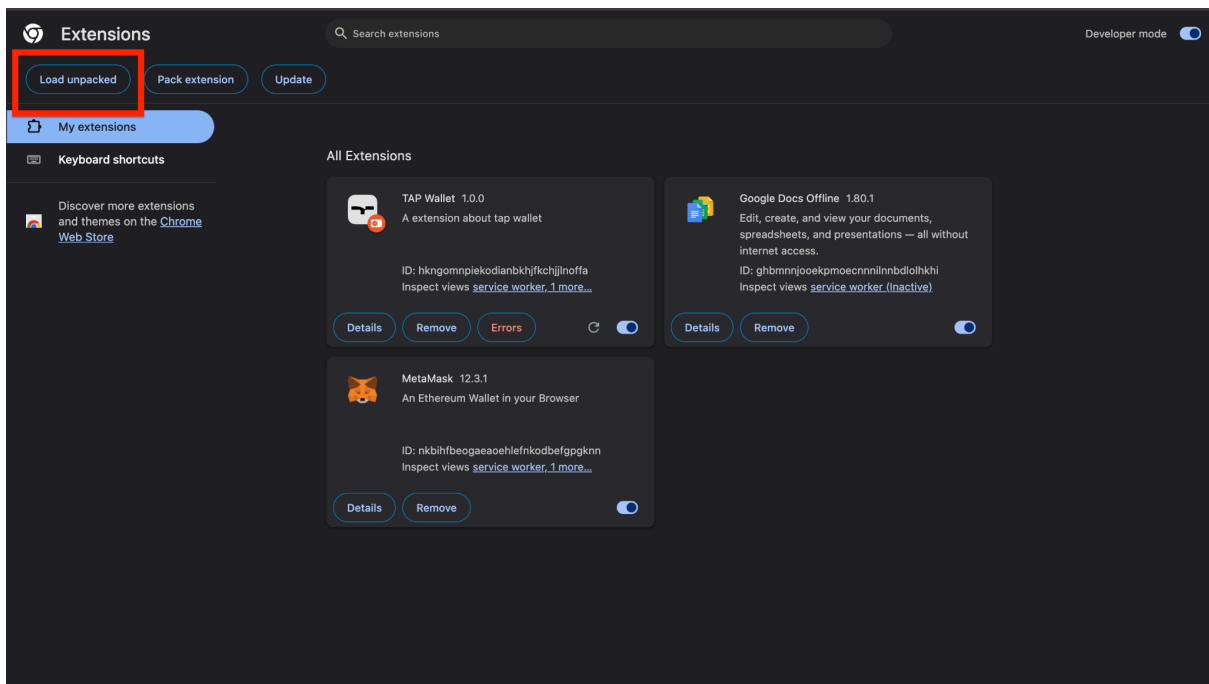

Step 1: Open [Chrome extension](chrome://extensions/)

Step 2: Turn on Developer mode

Step 3: Click on "Load unpacked" button

Step 4: Upload your folder (/dist/chrome)
